DEATH BENEFIT DUES
In the event you leave employment seeking permanent and total disability, YOU MUST CONTINUE PAYING YOUR DEATH BENEFIT DUES until such time as permanent and total disability status is established. As a general rule, disability determination routinely takes from 6 to 8 months. Please inform our office of such status and any overpayments will be refunded.

Do not permit your DEATH BENEFIT DUES to become delinquent over 90 days. All GMP members are responsible for making payments to maintain death benefit eligibility. All early retirees are responsible for payment to age 65. If you are self-paying, indicate your local union number and forward your check to:

Randy J. Gould, GMP Int’l. Secretary-Treasurer
608 E. Baltimore Pike, PO Box 607, Media, PA 19063

Persons wishing to report a death or discuss the death benefit may call the Death Benefit Department at 610-565-5051 ext. 221. Remember to update your beneficiary card as needed. The beneficiary of record is solely entitled to the Death Benefit.

All claims must be filed within five (5) years of death.
The old standards applied by OSHA are out of date and fail to provide adequate protection to those exposed to silica. OSHA has finally completed and proposed new silica standards. These new standards will reduce – but not eliminate – illnesses and death from exposure to silica.

The proposed new standard substantially reduces the permissible exposure level (from 100ug/m to 50ug/m) and requires employers to reduce silica dust by following a hierarchy of controls, including engineering and workplace practice controls and personal protective equipment where necessary to meet the PEL. The new standard requires regular exposure monitoring and medical exams for workers who are exposed to silica and requires training about the hazards of silica and appropriate control methods.

The GMP supports implementation of the new silica standards. The new standards are feasible and can be accomplished by employing methods to control dust which have been in use for decades. OSHA is currently seeking comments on the proposed rule and public hearings on the proposed rule will be held in March, 2014. I will report the results of the proposed rulemaking process when a final decision on the rule is made.

2014 marks the 20th anniversary of NAFTA, which was only the first in a series of trade agreements that have undermined millions of middle-class American jobs. So it is ironic that this year the supporters of that failed model are bringing forward a fast track trade promotion bill to bring us more of the same: The Baucus-Hatch-Camp “Fast Track” Legislation (S. 1900/H.R. 3830) This “fast track” bill establishes the process by which trade deals, like the Trans-Pacific Partnership (TPP), can be submitted to Congress to receive an expedited vote—a process that allows no amendments and limited debate. “Fast track” has given us deals like NAFTA that have led to a U.S. trade deficit of $540 billion in 2012, millions of lost jobs, and communities devastated in the wake of closed factories and lost economic opportunities.

The GMP opposes the Baucus-Hatch-Camp “Fast Track” bill. Instead of Baucus-Hatch-Camp, workers deserve a better trade policy that ensures that Congress has a fair opportunity to influence trade deals and to send bad trade deals back to the negotiating table for improvement. Since the Baucus-Hatch-Camp bill will only lead to more bad trade deals—like the TPP appears to be—we strongly urge all Members of Congress and Senators to oppose it.
President Smith had the honor of swearing in Brenda Scotland as he named her the new Vice President of Area 3. Vice President Scotland was named as International Representative by then President James Rankin in 2000, in 2003 she was appointed as an Executive Officer and in 2006 was named the Director of Organizing by then President John Ryan.

Vice President Scotland entered the trade with Owens-Corning in 1978 where she was a member of Local Union 15 and served in many capacities through the years from President to Shop Steward. Brenda has participated in many labor programs throughout the years to include Summer School at West Virginia University, University of Wisconsin’s School of Labor Studies and the George Meany Center.

Vice President De La Fuente started in the trade in 1973 at the Macaulay Foundry in Berkeley, California where he was a member of Local Union 164B and served on the Executive Board in 1977 and as a business manager from 1978 to 1987. In 1987 he was hired as an International Representative by then president James Hatfield. In March of 2001 he was named an Executive Officer at the Mid-Winter board meeting by then President James Rankin. In 2003 President Rankin named him Vice President of Area 3 where he has served for the last 10 years.

In addition to his large involvement with the GMP Vice President De La Fuente has served as the President of the City Council in Oakland, California. He has been a delegate to the Alameda County Central Labor Council for over 15 years and a board member for almost 10. He is a member of the Oakland Housing Authority, the Alameda County Economic Development Advisory Board, Board of Directors of La Raza Labor Institute in San Francisco, California and a member of the Joint Powers authority for the Alameda County Coliseum.

We wish Vice President De La Fuente a happy and healthy retirement with his wife Elvia and his children for many years to come.
In December 373 delegates attended the Indiana State AFL-CIO Convention which was held for three days at the Holiday Inn located in Terre Haute, Indiana. The delegation was comprised of representatives from 148 Local Unions throughout the state of Indiana which represents over 80,000 members. In total with guest the attendance at the convention was approximately 475. The delegation had the honor of electing a new president Brett Voorhies, they re-elected Joe Breedlove to the Recording Secretary position and we are proud to say that Executive Officer Rick Vitatoe was also re-elected as Vice President.

JUST BECAUSE YOU’RE UNION.

The GMP Union Plus Mortgage program, with financing provided by Wells Fargo Home Mortgage, was designed to give America’s hard working union members the extra benefits they deserve.

- Union Plus Mortgage protection during hardship such as strike, disability and job loss
- $500 Union Plus First-Time Home Award
- $500 Wells Fargo My Mortgage Gift℠ award card after closing on a purchase or refinance loan

Call 1-800-848-6466
or visit UnionPlus.org/Mortgage

1Eligible individuals can receive the Wells Fargo My Mortgage Gift℠ promotion after closing on a new purchase or refinance loan secured by a first mortgage with Wells Fargo Home Mortgage. The promotion is not available with all mortgage loan products. This promotion is void where prohibited and subject to change or cancellation with no prior notice. Please see website for more information.

JUST BECAUSE YOU’RE UNION.

The 15% GMP Union Plus AT&T Wireless Discount was created to help hard-working union members like you save on wireless phone services from AT&T, the only national unionized wireless provider. Make the switch to AT&T to take advantage of this union member discount.

- Save 15% on monthly AT&T voice service and select data plans
- Qualify for up to $200 in rebates when you use your Union Plus Credit Card to buy a new smartphone or switch to AT&T
- Support 45,000 union brothers and sisters working at AT&T

To start saving, visit UnionPlus.org/ATT

Discount FAN: 3508840

Credit approval and new two-year service agreement required. Offer cannot be combined with any other discounts. The 15% Union Plus AT&T wireless discount is not available on the iPad, additional lines for family plans, unlimited plans and Unity plans. Data services: Only the 5GB data plan and the shared minutes and data for AT&T Mobile share plans are discounted. All other individual data plans, data plans on secondary lines, and text plans are not discounted. Other conditions and restrictions apply. Offer available to union members, retired union members, and Union Plus Credit Card holders only. For more information, visit UnionPlus.org/ATT. AT&T is a registered trademark of AT&T Intellectual property. Union Plus is a registered trademark of Union Privilege.
Workers who inhale very small crystalline silica particles are at increased risk of developing serious silica-related diseases. These tiny particles (known as “respirable” particles) can penetrate deep into workers’ lungs and cause silicosis, an incurable and sometimes fatal lung disease. Crystalline silica exposure also puts workers at risk for developing lung cancer, other potentially debilitating respiratory diseases such as chronic obstructive pulmonary disease (COPD), and kidney disease.

To improve worker protection, OSHA is proposing two new crystalline silica standards: one for general industry and maritime, and the other for construction. The proposals are based on extensive review of scientific evidence, current industry consensus standards, and OSHA’s outreach, including stakeholder meetings, conferences, and meetings with employer and employee organizations.

OSHA encourages the public to participate in this rulemaking. Information on submitting comments on the proposed rule and participating in public hearings can be found at www.osha.gov/silica. Your input will help OSHA develop a final rule that adequately protects workers, is feasible for employers, and is based on the best available evidence.

Why is OSHA proposing a crystalline silica rule?
OSHA’s current permissible exposure limits (PELs) for crystalline silica were adopted in 1971 and have not been updated since that time. They do not adequately protect workers; they are outdated, inconsistent and hard to understand.

Strong evidence shows that current PELs do not adequately protect worker health. The current PELs are based on research from the 1960s and earlier and do not reflect more recent scientific evidence. For example, since the current PELs were adopted, the U.S. National Toxicology Program, the International Agency for Research on Cancer, and the National Institute for Occupational Safety and Health have all identified respirable crystalline silica as a human carcinogen.

The current PELs are formulas that are difficult for many employers to understand; the PELs for construction and shipyards are based on a method for measuring worker exposures that has not been commonly used for more than 40 years.

The current PELs for construction and shipyard workers allow them to be exposed to risks that are over twice as high as for workers in general industry. The proposed rule would provide consistent levels of protection for workers in all sectors covered by the rule.

What is crystalline silica?
Crystalline silica is a basic component of soil, sand, granite, and many other minerals. Quartz is the most common form of crystalline silica. Cristobalite and tridymite are two other forms of crystalline silica. All three forms may become respirable size particles when workers chip, cut, drill, or grind objects that contain crystalline silica.

For additional information and resources please visit OSHA.gov.
ARDAGH PLANT TOUR

International Vice President Rickey Hunter recently visited Local Union 234 and toured the Ardagh plant in Warner Robins, Georgia.

TOP RIGHT: Pictured along with Vice President Hunter and Local Union President David Swain is Local Union member Sheree Bell.

BOTTOM RIGHT: Pictured are (L-R) Local Union 234 president Davis Swain, Shop Steward Alonzo Green, Business Committee Person Diane Johnson and member Mike Johnson with International Vice President Rickey Hunter.
on October 4, 1987, the United States of America and Canada concluded negotiations on the Free Trade Agreement. The leaders of both countries, Ronald Reagan for the United States of America and Brian Mulroney for Canada signed the symbolic document on January 2, 1988. The agreement would eliminate the barriers for trade in goods and services between the two countries.

The agreement would create conditions that would make for fair competition within that “Free-trade area, it would “liberalize conditions for investment”, there would be an effective vehicle to resolve the disputes that may arise from time to time over the application of the Agreement and it would also become the founda-
The evolution and expansion of the FTA has left the middle class in both United States and Canada facing extinction.

The Canadian dollar in 1990 and 1991 spiked upward. The result was manufacturing in Canada suddenly became significantly more expensive and the mass exodus of manufacturing began. It could be made cheaper in the Southern USA and the removal of tariffs aided the exodus. Job loss in Canadian manufacturing was incredible and the FTA was too blamed.

Then came the mid-1990s and the Canadian dollar fell to unbelievable and never before seen lows. Now it would be the USA’s turn and the costs of cheaper produced Canadian products, mostly oil and lumber could be imported into the USA tariff free. Hollywood saw the advantage as well and began filming in Canada more that affected the US film industry and jobs in this sector. Since the Canadian dollar had gone down so much (at times as much about $0.40 on the $1.00) manufacturing became attractive once again but if a company returned to Canada they had a clean slate. The collective agreements and union memberships were long gone, now labor in both countries were poised to be harmed.

Now the two men symbolically responsible for the Free Trade Agreement are no longer in power. The election campaigns that followed saw promises from the candidates to “tear up the Free Trade Agreement” in both countries. What we saw were expansions to the North American Free Trade Agreement and the successive others all of which have failed the citizens of both countries. Manufacturing has been hit so hard it probably will not return the levels that once provided workers in both countries with good wages, benefits and pensions.

All that the FTA did was slant the playing field in favor of the corporations and cost the public its quality of living.

The FTA did indeed make the cross-border trade easier. Labor in Canada did say that this was the smoke screen and that big business really was seeking a way of lowing wages and being able to gain their agenda more freely. Companies would be able to re-locate easier and without penalty. The prediction that the Auto Pact would be in jeopardy was true. It was no longer possible once it expired under the FTA. The auto industry was hit particularly hard along with the industries that supplied them; the media depicted the auto sector as greedy, lazy and unproductive. Unionized workplaces and unions became the target of blame as well and all that was wrong in both countries and this continues today even as union saturations continue to fall.

The evolution and expansion of the FTA has left the middle class in both United States and Canada facing extinction. Workers who lost their jobs due to the effects of the FTA struggle in low paying jobs. Workers are happy to have the job they have and are bullied by the corporations of moving abroad if the workers attempt unionize.

Twenty-five years since the Free Trade Agreement was born and that anniversary is called the “Silver Anniversary”. The silver is tarnished though and it is stained with job loss and stagnant opportunities for the workers. Corporate greed has taken its toll on the North American Labor Movement. The FTA was billed as a great opportunity for workers and it has been nothing more than a failure. The lives of the citizens of both countries have not been bettered. We likely will not see the day that North America has a strong manufacturing base that truly fuels the economies of both countries.

So with that I wish the Free Trade Agreement a very unhappy anniversary.
JUST BECAUSE YOU’RE UNION.

The GMP Credit Card program is one of 40 Union Plus benefits—from AT&T wireless discounts to group-rate insurance—designed to meet the needs of hard-working union members like you.

• Earn unlimited, no-hassle, 1.5% cash rewards on every purchase
• Hardship assistance grants¹ in times of need
• Competitive rates

Learn more at GMPcard.com or call 1-800-522-4000

¹Certain restrictions, limitations, and qualifications apply to these grants. Additional information and eligibility criteria can be obtained at UnionPlus.org/Assistance. Another card option is available. Credit approval required. Terms & Conditions apply. Union Plus Credit Cards issued by Capital One, N.A.
